VX-7R

On the **VX-7R**, the key that is used to turn on wires is in the lower left hand corner of the pad, next to the "7" key. It is the "TX PO LK" key and looks like this:

This is the *same* key used to lock and unlock the key pad!

TX PO LK

This is the *same* key used to lock and unlock the key pad!

If you hold the key for 2 seconds, it locks the

Bottom Left Key, to left of "7"

If you hold the key for 2 seconds, it locks the key pad. If you press it just once (or accidentally touch it while holding the radio), it turns wires ON.

You can tell wires is enabled if you look at the top left of your display and see the following symbol:

In the **VX-7R** manual, page 67:

"With the Internet Connection feature activated [...], the **VX-7R** will generate a brief (0.1 second) DTMF tone according to your selection in step 2. This DTMF tone is sent at the beginning of every transmission to establish or maintain the link to the remote **WIRES™** repeater."
