What is Parks On The Air or POTA?

- It is not a contest.
- An opportunity to practice your radio skills in a different environment.
- Field Day everyday!
- Operate away from RF noise and HOA restrictions.
- Being the station that everyone wants to contact.
- Practice handing pileups and passing information.
- Enjoying nature and radio at the same time.
- A chance to bring amateur radio into the public and display our capabilities.
- Most importantly it's FUN!

History

- In 2010 the original Parks On The Air began. The intent was to get folks outdoors and to combine the great outdoors with our amateur radio hobby.
- In 2016 the ARRL launched a one year program called NPOTA to celebrate the 100th anniversary of the National Park system.
- This event was very popular and many wanted it to continue.

History

- In 2018 a group formally launched a non profit organization to keep Parks on the Air going.
- Now only 6 years later it's grown to be a very popular past time world wide.
- More than 11,000 parks in the USA are included in this program.
- In Oregon we currently have 343 parks to visit.
- Clackamas County currently has ~18 parks.

POTA APP and Website

- <https://pota.app/#/> parksontheair.com

The screenshot shows the POTA app website interface. At the top, there is a green navigation bar with the "Parks on the Air" logo, a location pin icon, a calendar icon, and "SIGN UP" and "SIGN IN" buttons. Below the navigation bar, the "Active Spots" section is displayed, with a refresh timer indicating "Data will refresh in 34 seconds". The filters are set to "Band: All 20", "Mode: All 20", "Program: All 20", "QRT: Show 20", and "Hunted: Show 20". The sort order is "Time".

Two active spots are shown:

- JK2NWU/P @ JA-1465**
 - Location: JA-1465 Owari Koiki Ryokudo Prefectural Park
 - Mode: JP-AI
 - Frequency: 7041 kHz (FT8)
 - Call Sign: JK2NWU
 - Mode: FT8
 - Last heard: 26 sec ago at 05:15 UTC
- KM6TAU @ K-10416**
 - Location: K-10416 Grizzly Island State Fish and Wildlife Area
 - Mode: US-CA
 - Frequency: 7047.5 kHz (FT4)
 - Call Sign: K1RA-#
 - Mode: RBN -5 dB via K1RA-#
 - Last heard: 30 sec ago at 05:15 UTC

At the bottom of each spot card, there are "RE-SPOT" and "1" buttons.

Hunter

- You can hunt all hours of the day and from the comfort of your home QTH.
- Logging is not a requirement for hunters.
- Without hunters there would be far less stations to contact.
- You can earn awards for hunting.

Getting Started for Hunters

Hunters are the individuals located anywhere, who contact the activators in the park. As a hunter, the rules are few and simple.

- Follow the law.
- Follow the [DX Code of Conduct](#).
- Follow the Golden Rule.

The first place to start as a hunter is to head to <https://pota.app>. The home page you land on will be the spotting page, which lets you know who is on the air, what parks they are in, and what frequencies and modes they are currently operating on. Spin the dial, and answer their call if you can hear them. If you make a contact, you've officially started in POTA! That's all there is to it!

While at <https://pota.app>, click the "sign up" button to create an account, which will let you see your progress towards certificates and awards based on the logs that the activators you contacted submit. POTA is on the honor system, based exclusively on activator logs, so as a hunter, you don't have to lift a finger (Other than the one that hits your key or PTT!).

Getting Started for Activators

Activators are the individuals that pack up their portable gear and head out to a park, and set up a station. After you've done some hunting, you might want to take a shot at activating. The rules for activators are still fairly simple:

- Follow the law

Activator

- Activating takes some planning.
- It's your event, you run the activation however works best for you.
- Logging the contacts is your responsibility.
- 10 contacts are required to have a "successful activation".
- You can earn awards for activating.

Getting Started for Activators

Activators are the individuals that pack up their portable gear and head out to a park, and set up a station. After you've done some hunting, you might want to take a shot at activating. The rules for activators are still fairly simple:

- Follow the law
- Follow the [DX Code of Conduct](#)
- Follow the Golden Rule
- Leave no trace
- Follow any instructions from park rangers you encounter
- Be courteous of the public space you are using
- You must have an account registered at <https://pota.app>
- You and all your equipment must be within the boundaries of the park(s)
- You must submit an ADIF log after your activation is complete.
- Follow the Rules detailed here (<docs.pota.app>)

Once familiar with the rules, head to the map <https://pota.app/#/map>. Allow location services to quickly zoom to your location, or use the drop-downs to choose an entity and location. The yellow dots are approximate locations of parks in your area. Check official sources (park websites etc.) and ensure you are within the park's boundary.

Once you've chosen a location in the park, set up your gear, find a quiet frequency, and start calling CQ. While doing your initial CQ calls, you'll want to head to <https://pota.app> and click the button to add a spot. Once you've spotted yourself, the hunters will probably come fast and

OREGON HISTORY CHAMPOEG

This area, once named tchampuick, the 'place of yampah' was the traditional homeland of the Tualatin Kalapuya tribe. Fur trappers first arrived here by canoe in 1811, and they found lush open prairies bordering the Willamette River. In 1830, French-Canadians retiring from the Hudson's Bay Company and their Indian wives began farms and raised families near here. Champeog soon became a shipping and commercial center. In 1851, local tribes and the U.S. government negotiated six treaties at this location; all went unratified by Congress. A thriving town existed here until the flood of 1861 swept away all the buildings. It is also the memorial site of the May 2, 1843, meeting of the "inhabitants of the Willamette settlements" who formed a provisional government, the first American government on the Pacific coast.

- [Forest Roads Conditions](#)
- [Sno-Park Permits required Nov. 1 thru Apr. 30](#)
- [Road closures on Barlow Ranger District](#)
- [Road closures on Clackamas River Ranger](#)

Field Deployment

- Always check for park or pass requirements.
- Oregon State Park fees and yearly passes. Day use \$5 Yearly \$30. USFS – NW Forest Pass, snow park, etc.
- Check park hours and restrictions.
- Where do you set up at the park?
- Out of the way of other park visitors. Share the space that we all own and love.
- Find a nice spot in the shade or with the best view.
- The park ranger has the final say.
- Historic sites may prevent driving stakes in the ground or attaching antennas to trees.
- Dogs and small children may be curious so be prepared if they stop by.

Field Deployment

- Safety considerations - The general public doesn't know what you're doing and what to watch out for.
- Flag or cone off wires, coax, etc. when appropriate.
- Remember RF safety distances from the unaware park goers.
- Park activation zone- **“You and all your equipment must be within the boundaries of the park(s).”**

Equipment Considerations

- Radio – Home rig, something small and portable, QRP?
- Antenna – Simple wire dipoles, small telescoping verticals, ham sticks, etc.
- Power source – Battery, generator, vehicle powered. If powered from your car, make sure you can still drive home. Remember proper wiring techniques. Fuses, wire gauge, Andersons are best.
- Logging – Computer, paper, phone APPs. Paper doesn't need batteries and always works.

ARRL

Creature Comforts

- Table and chairs - The more comfortable you are, the longer you can stay in the park. Many locations will have picnic tables. But sometimes the best view requires your own furniture.
- Sun shade or Tent - Limit your exposure to the elements. Don't cause yourself an emergency situation.
- Beverages - Stay hydrated.
- Snacks - PCT, those folks will eat or drink anything.
- Blankets or extra clothing.
- Flash lights, USB adapters, phone chargers.
- Extra writing utensils, paper.
- Not all parks have bathroom facilities.

Spotting

- POTA App self spot.
- Spotting can be scheduled before you leave the house.
- It's generally easy to tell once you've been spotted.
- Spotting others to help them out. Especially when they do not have internet/cell service.
- Re spot – Be sure you spot the information accurately.
- Reverse Beacon Network – RBN CW spotting.

Logging Process

- The exchange – **Date, UTC time, callsign, band, mode**. These are the only data points required for POTA logging.
- Park to Park – Log Park#
- Export ADIF file from your own logging software then upload to the POTA website, or manually enter contacts from the beta manual log entry.

Awards

- Wall paper opportunities.
- Measure your progress.
- You start to recognize stations just like when contesting or participating in nets.
- The POTA site keeps track of all your awards and you can print from the site.

POTA Yearly Events

☰  Official Events

KC7TAK

Official Events

Curious about our "Official" Parks on the Air events? Currently POTA has 5 official events throughout the year, as detailed below.

Events start at 0000 UTC and end 2359 UTC on the days listed:

New Year's Week

First full week of the new year

Casual contacts to help ring in the new year!

Support Your Parks

This event happens seasonally, on the 3rd full weekend of the month (Saturday & Sunday UTC). These are 'activity weekends' where the main purpose is to get out in the parks, and have as much fun as possible.

Winter - 3rd Full Weekend of January.

Spring - 3rd Full Weekend of April.

Summer - 3rd Full Weekend of July.

Autumn - 3rd Full Weekend of October.

Advanced Topics

- Multi Parks
- Working P2P
- Dual and triple ops.
- Early shift
- Late shift
- Rover
- Band propagation report
- Frequencies to avoid – Maritime mobile 14.300 etc.
- Working the locals
- Kilo and challenging awards - N1CC 10 different bands from 10 different parks.
- Parks on the Air (POTA) Facebook group

The Considerate Operator's Frequency Guide

The following frequencies are generally recognized for certain modes or activities (all frequencies are in MHz) during normal conditions. These are not regulations and occasionally a high level of activity, such as during a period of emergency response, DXpedition or contest, may result in stations operating outside these frequency ranges.

Nothing in the rules recognizes a net's, group's or any individual's special privilege to any specific frequency. Section 97.101(b) of the Rules states that "Each station licensee and each control operator must cooperate in selecting transmitting channels and in making the most effective use of the amateur service frequencies. No frequency will be assigned for the exclusive use of any station." No one "owns" a frequency.

It's good practice — and plain old common sense — for any operator, regardless of mode, to check to see if the frequency is in use prior to engaging operation. If you are there first, other operators should make an effort to protect you from interference to the extent possible, given that 100% interference-free operation is an unrealistic expectation in today's congested bands.

<i>Frequencies</i>	<i>Modes/Activities</i>	<i>Frequencies</i>	<i>Modes/Activities</i>
1.800-2.000	CW	14.233	D-SSTV
1.800-1.810	Digital Modes	14.236	Digital Voice
